Exploring Canadian geography

Grade 9 · Answer Sheet A

Name: _____

Date: _____

Part 1

1. **d) About 42 million** — About how many people lived in Canada on July 1, 2026?
2. **c) Ground that stays frozen for two or more years in a row** — What is permafrost?
3. **d) The Mackenzie** — What is Canada's longest river?
4. **c) A huge meteorite crater formed about 1.8 billion years ago** — What makes Sudbury, Ontario, rich in nickel?
5. **c) A graph showing how many people are in each age group** — What is a population pyramid?
6. **b) In Alberta's oil sands** — Where is most of Canada's oil?

Part 2

3 — The Trans-Canada Highway opens (1962)

1 — Confederation: four provinces form Canada (1867)

5 — Nunavut becomes a territory (1999)

2 — Alberta and Saskatchewan become provinces (1905)

4 — The northern cod fishery is closed (1992)

Part 3

Why do so few people live in the Canadian Shield and the North, even though they cover most of Canada?

A good answer mentions: Any two or three: thin soil and rock make farming hard; long, very cold winters; permafrost makes building costly; few roads, so goods are expensive; jobs are mostly in mining, forestry or government; people settled first along rivers, lakes and the US border, where trade was easier.
